Electric Minds

- Not-for-profit
- Combine machine intelligence with human ingenuity
- Inspire new ways of thinking
- Help solve some of the most challenging problems
- AI for good

Prompts

- User-given instruction or statement that guides the AI's response or output.
- Given in natural language, making it intuitive for humans to interact with AI.
- Clear and specific prompts help the AI understand the task and deliver more accurate results.
- AI uses the prompt to grasp context and intent, which informs its responses.

Starry Night

Using oil paint, create a tactile night sky with thick, impasto strokes in deep blue and indigo, swirling energetically. Add a luminous crescent moon and radiant stars with heavy dabs, each surrounded by swirling halos. Below, paint a quaint town with refined strokes, windows glowing soft yellow. A prominent steeple reaches upwards, mirroring the sky's turbulence. To the left, a dark, flame-like cypress tree bridges the town and sky, painted with writhing, thick strokes. Softly depict distant rolling hills at the horizon. Balance the sky's energy with the calm landscape below.
